

Assignment 4

„3d Computer Vision“

Deadline 29.06.2026.

Remark:

- Use your solution from the previous assignments.
- You are not allowed to use any libraries or third party tools for the numerical computations, except the eigen-lib in the 3dCV-Framework-download.

Part 1 (PCA)

Implement the PCA algorithm and apply it to the bunny point cloud.

Part 2 (PCA-alignment) required only for the 6th ETCS...

Use the PCA-algorithm of Part 1 to align to slightly translated and rotated versions of the bunny point cloud.
